INJURED?

Don't be Pushed Around by an Insurance Carrier:

- **CALL US** if an insurance carrier is denying you proper medical treatment or if a nurse case manager is interfering with your medical care.
- **CALL US** before you attend an "independent" medical examination, the purpose of which may be to deny you further benefits.
- **CALL US** if you are unable to work and are not being paid temporary disability benefits totaling 70% of your gross average weekly wage, including overtime, up to \$969/week, due to a work injury.
- **CALL US** if you are released to return to work light-duty and there is no light-duty option at your job.
- **CALL US** even if you received workers' compensation benefits for the entire time you were out of work and returned to the same job. You may still be entitled to receive a substantial award for partial permanent disability, especially if you underwent surgery.
- **CALL US** before you speak with an insurance carrier following any accident to avoid being underpaid on your claim.

Call for a consultation, which includes a complimentary copy of the "Employee's Guide to NJ Workers' Compensation Law."
